This very special blend (formerly known as So Sweet) was developed by Techno Alimenti more than 10 years ago, as a sugar replacer, without Aspartame etc. and to be used for conventional cooking and baking.

The invitro tests as well as invivo tests have demonstrated a very low GI as well as the resistant fibre-like effect of the carrier showing a controlled blood sugar and insulin sparing effect. It contains no fructose or sucrose and is a preservative free product at a cost efficient price, for the whole family.

Clean fresh taste, and backed by excellent testimonies too numerous to count, as well as laboratory and clinical safety studies, we also give our guarantee to you, of sale or return.

INGREDIENTS:

Semi-nutritive modified starch (carrier)

Gluside and Sulfamate Blend

SPECIAL FEATURES:

NO Aspartame

NO Fructose

NO Phenylalanine

NO Cane Sugar

NO Lactose
